## Ultra Soft, Reinforced Gap Filler Pad

UTP100 thermal conductive silicone pad is made of silica gel and thermal conductive ceramic filler, with glass fiber cloth as reinforcing material, and processed by special technology. With single-side self-adhesive, puncture proof, anti-penetration voltage enhancement, is a very soft, has excellent compressibility of thermal conductivity silica gasket, and electronic components close contact, effectively reduce the interface thermal resistance. At -40°C~150°C can work stably, at the same time meet the UL94V0 grade flame retardant requirements.
